FRUIT TREE DEPARTMENT

INFORMATION FOR PURCHASERS

PACKING CHARGES: We charge for same only to cover the cost of material used.

PRICES: All prices quoted in this list are for stock at Fresno. Freights and express are to be paid by purchasers.

SUBSTITUTIONS: Unless advised to the contrary, we will make substitutions where necessary to fill orders complete.

ERRORS: Errors or complaints must be reported within ten days of receipt of goods.

BASIS OF THE SIZES AND CALIPER MEASURE-MENTS FOR TREES

On all deciduous fruit trees, except Almonds and

Figs, the caliper and height combined determine the grade of the tree.

Not less than 1 inch represents 8 to 10 ft. trees.

Not less than ½ inch represents 6 to 8 ft. trees.

Not less than ½ inch represents 4 to 6 ft. trees.

Not less than ¾ inch represents 3 to 4 ft. trees.

Not less than ¼ inch represents 2 to 3 ft. trees.

Almonds and Figs are inclined to grow stocky, and the caliper measurements will govern the grade regardless of the height of the tree.

ALMONDS

Not less than ½ inch represents 4 to 6 ft. trees. Not less than ¾ inch represents 3 to 4 ft. trees. Not less than ¼ inch represents 2 to 3 ft. trees.

FIGS

Not less than $\frac{5}{4}$ inch represents 4 to 6 ft. trees. Not less than $\frac{1}{4}$ inch represents 3 to 4 ft. trees. Not less than $\frac{3}{4}$ inch represents 2 to 3 ft. trees.

Stocks mentioned in this list will be furnished as follows: 5 of a variety at the 10 rate; 50 at the 100 rate; 300 at the 1000 rate.

PEAR BUDDED ON QUINCE ROOTS— "Double-worked on Beurre Hardy Pear"

The Beurre Hardy Pear is used for budding on the Quince because of its great affinity for this stock. Many other varieties of Pear will not take on the the Quince. We therefore bud the Beurre Hardy first on the Quince stock and then in turn bud the various varieties listed below on the Beurre Hardy.
